Jonathan Rothe

Jonathan.E.J.Rothe@gmail.com | (402) 516-4633 | Jonathan-Rothe.com | Omaha, NE

Professional Summary

Practical, hands-on cybersecurity and compliance professional with a B.S. in Applied Computing and a Cybersecurity plus MIS double-minor. Experience supporting security operations, compliance readiness, and platform maturity across SaaS and healthcare-adjacent environments. Proven background in log analysis and incident triage using Splunk, API and authentication troubleshooting, and risk-based security reviews of systems handling sensitive data. Active independent consultant delivering HIPAA and SOC 2 readiness support, risk registers, vendor reviews, cybersecurity training content, and security platform documentation revamps. Strong technical communicator with experience translating complex security concepts into clear documentation, LMS-based training, and actionable guidance for technical and non-technical stakeholders. CompTIA A+ and Security+ certified.

Core Skills

- Security operations and analysis: Log analysis and incident triage (Splunk, audit logs), anomaly detection, root-cause investigation
- Risk, compliance, and governance: HIPAA and SOC 2 readiness, risk register development, risk reviews, policy analysis, control mapping, Vanta
- Security enablement and training: LMS-based cybersecurity training development, security awareness content, platform-specific instructional material
- Security documentation and platforms: Cybersecurity platform documentation revamps, workflow and dashboard documentation, operational runbooks
- API and application security fundamentals: API integration troubleshooting, OAuth and token-based authentication, Postman testing, data flow analysis
- Systems and infrastructure: Windows and Linux administration, Active Directory basics, secure configuration and access control
- Networking fundamentals: TCP/IP, subnetting, Wireshark, Nmap, traffic analysis fundamentals
- Cloud and SaaS fundamentals: AWS (EC2, S3, VPC, IAM), SaaS troubleshooting, third-party integrations
- Scripting and automation fundamentals: Python, PowerShell, Bash
- Technical communication and collaboration: Confluence, Jira, Slack, Salesforce, technical writing for technical and non-technical audiences

Professional Experience

Independent IT, Cybersecurity & Compliance Consultant (Upwork)

2024 – Present

- Provide cybersecurity, compliance, and technical documentation services for multiple small businesses and startups across healthcare, SaaS, and technology sectors.
- Support HIPAA and SOC 2 readiness efforts, including risk register development, vendor risk review, policy analysis, and compliance documentation.

- Conduct security reviews of systems handling sensitive data, focusing on access control, logging, device security, and administrative safeguards.
- Assist organizations and individuals with vulnerability and risk assessments, as well as account and device hardening, under disclosure-restricted engagements.
- Deliver clear, professional cybersecurity training and presentation materials tailored to non-technical stakeholders.
- Maintain detailed documentation and progress tracking to ensure transparency, accountability, and high-quality deliverables for clients.

Toast — Technical Support & API Integrations
2023 – Present

- Cloud-based restaurant technology platform supporting payments, payroll, and third-party integrations at scale.
- Perform advanced troubleshooting of cloud and API-driven systems using structured log analysis (Splunk, audit logs, JSON event data) to identify anomalies, failures, and potential security issues.
- Validate API endpoints, authentication flows, OAuth/token behavior, and data mappings using Postman and internal tooling.
- Analyze application and integration logs to support incident triage, root-cause analysis, and fraud/risk investigations in collaboration with engineering and security teams.
- Support payment processing and sensitive data workflows, developing strong familiarity with access control, least privilege, auditability, and operational security practices.
- Collaborate cross-functionally with partner developers, internal engineers, and risk teams to resolve integration failures and improve system reliability and security posture.
- Contribute to internal and external documentation, improving clarity around integrations, troubleshooting procedures, and secure workflows.

Progression: Cloud Support Specialist (Tier I) → Payment Software Support Expert (Tier II) → API Integrations Expert

Salute Mission Critical — Data Center Security Officer at Google
May 2023 – Oct 2023

- Security for a Google data center; observed and protected physical infrastructure while collaborating with internal teams for access control.

Catholic Health Initiatives — Hospital Security Officer
Dec 2021 – May 2023

- Provided physical security at several area hospitals, including psych/behavioral units.

- Completed CPI de-escalation training; handled high-stress incidents with professional communication.

Clark International — Corporate Security Guard
Sep 2019 – Dec 2021

- Helped protect personnel and property at corporate customer locations; monitored and controlled access and cameras with security software suites.

Projects & Labs

- **Homelab & Cloud Security Lab** — Built and hardened a multi-host homelab with Kali, Ubuntu Server, Windows Server; implemented network segmentation, host hardening, and monitoring.
- **Full-Stack Web & App Deployment with API Integration** — Developed and deployed multiple front and back end websites and applications; integrated third-party APIs and built automated tests.
- **Local LLM & AI tooling** — Deployed local models with Ollama and LMStudio; experimented with AI for log parsing and automation.
- **HTB & THM Practice** — Daily hands-on challenge solving with security tooling, web exploitation, enumeration, and post-exploitation.
- **Splunk Lab** — Configured forwarders, created dashboards and alerts to surface anomalies and support investigative workflows.

Education

University of Nebraska at Omaha — B.S. of Applied Computing (Minors: Cybersecurity, MIS)

Graduated Spring 2026 | GPA: 3.7

Dean's List: Fall 2020, 2022, 2024, 2025 | Chancellor's List: Fall 2025

Metropolitan Community College — A.A.S Applied Sciences, 2018

Certifications

CompTIA Security+ (SY0-701) — Passed August 2025 (first attempt)

CompTIA A+ (Core 1101 and 1102) — Renewed August 2025 (first attempt)

Technical Tools & Platforms

- **Security Operations & Monitoring**
  Splunk (forwarders, dashboards, searches, alerting), audit logs, log-based investigations, anomaly detection
- **Risk, Compliance & GRC Platforms**
  Vanta, risk registers, vendor risk documentation, HIPAA and SOC 2 evidence collection, policy and control mapping
- **Security Enablement & Documentation**
  Cybersecurity platform documentation, operational runbooks, workflow and dashboard documentation, LMS-based training content development, security awareness materials
- **Application & API Security**
  Postman, OAuth and token-based authentication, API troubleshooting, data flow validation, third-party integrations

- **Networking & Traffic Analysis**
  Wireshark, tcpdump, Nmap, TCP/IP, subnetting, NetFlow fundamentals

- **Cloud & SaaS Platforms**
  AWS (EC2, S3, VPC, IAM, RDS), SaaS troubleshooting, cloud access controls, third-party service integrations

- **Operating Systems & Infrastructure**
  Windows Server (Hyper-V), Active Directory, Ubuntu Server, Linux CLI, Docker, virtualized lab environments

- **Security Tooling & Labs**
  Kali Linux, Metasploit fundamentals, Burp Suite (basic), John the Ripper, OWASP Top 10, HTB and TryHackMe labs

- **Scripting & Automation**
  Python, PowerShell, Bash, SQL

- **Collaboration & Productivity**
  Git, VS Code, Confluence, Jira, Slack, Salesforce

Leadership & Communication

Cofounder & President, UNO Mindfulness Club — 4+ years leading student organization, event planning, and peer mentorship.

Strong technical writing: Editing support playbooks, incident reports, and customer-facing documentation. Risk and vulnerability assessment reporting experience. LMS and documentation creation for Cybersecurity focused platforms and companies.
